KPI-CHAT v2021.1.2

Bug Fixes

- Upgraded the KPI CHAT email template to no longer make use of base 64 format images;
- Updated KPI CHAT password encryption.

KPI-CHAT v2021.1.0

Features & Improvements

- **Permissions**
 - User permissions have been enhanced and now allows you the capability to control who can see and contribute to chats.
 - Admin users can be specified per channel, giving you more control.
- KPI CHAT now functions similarly to the popular chat applications you know and love with added functions now available such as:
 - Unread Message Count display
 - Ability to Archive channel
 - Ability to Delete a message
 - Ability to "Reply" to a specific message in a channel
 - Ability to "Edit" a sent message
 - Ability to search Channels
- KPI CHAT is also now available in both English and German.
- You can now customize colours and themes on the application to match your company's Corporate Identity.

Known Issues

- PowerBI - When the "All" filter is used, the full list displays in the header – this is not circumventable at this point, as this is a function of the BI Tool

KPI-CHAT v2020.11.1

2021-02-03

Features & Improvements

- New permission: KPI-CHAT System Administrator [KC-1112]
- Provide password to get access on newly synced channels [KC-1114]
- Cant @ users in kpi chat that don't have an email address set [KC-1208]

Bugfixes

- Text Editor is Missing when opening a channel through email link and messenger [KC-1186]
- Sync: service must not check permission schemes for sync related APIs [KC-1182]
- Can't delete user that has ever triggered a sync [KC-1181]

KPI-CHAT v2020.11.0

2020-11-30

Features & Improvements
